

ADDING AND SUBTRACTING FRACTIONS TASK CARDS

SHELLEY
GRAY

SAME DENOMINATORS

Make this fraction by adding two smaller fractions. Then represent the equation on the visual model.

$$\frac{6}{10}$$

Adding and Subtracting Fractions Task Cards: Card #1

Solve the equation and represent it on the visual model on your recording sheet.

$$\frac{6}{12} + \frac{2}{12} =$$

Adding and Subtracting Fractions Task Cards:

Solve the problem.

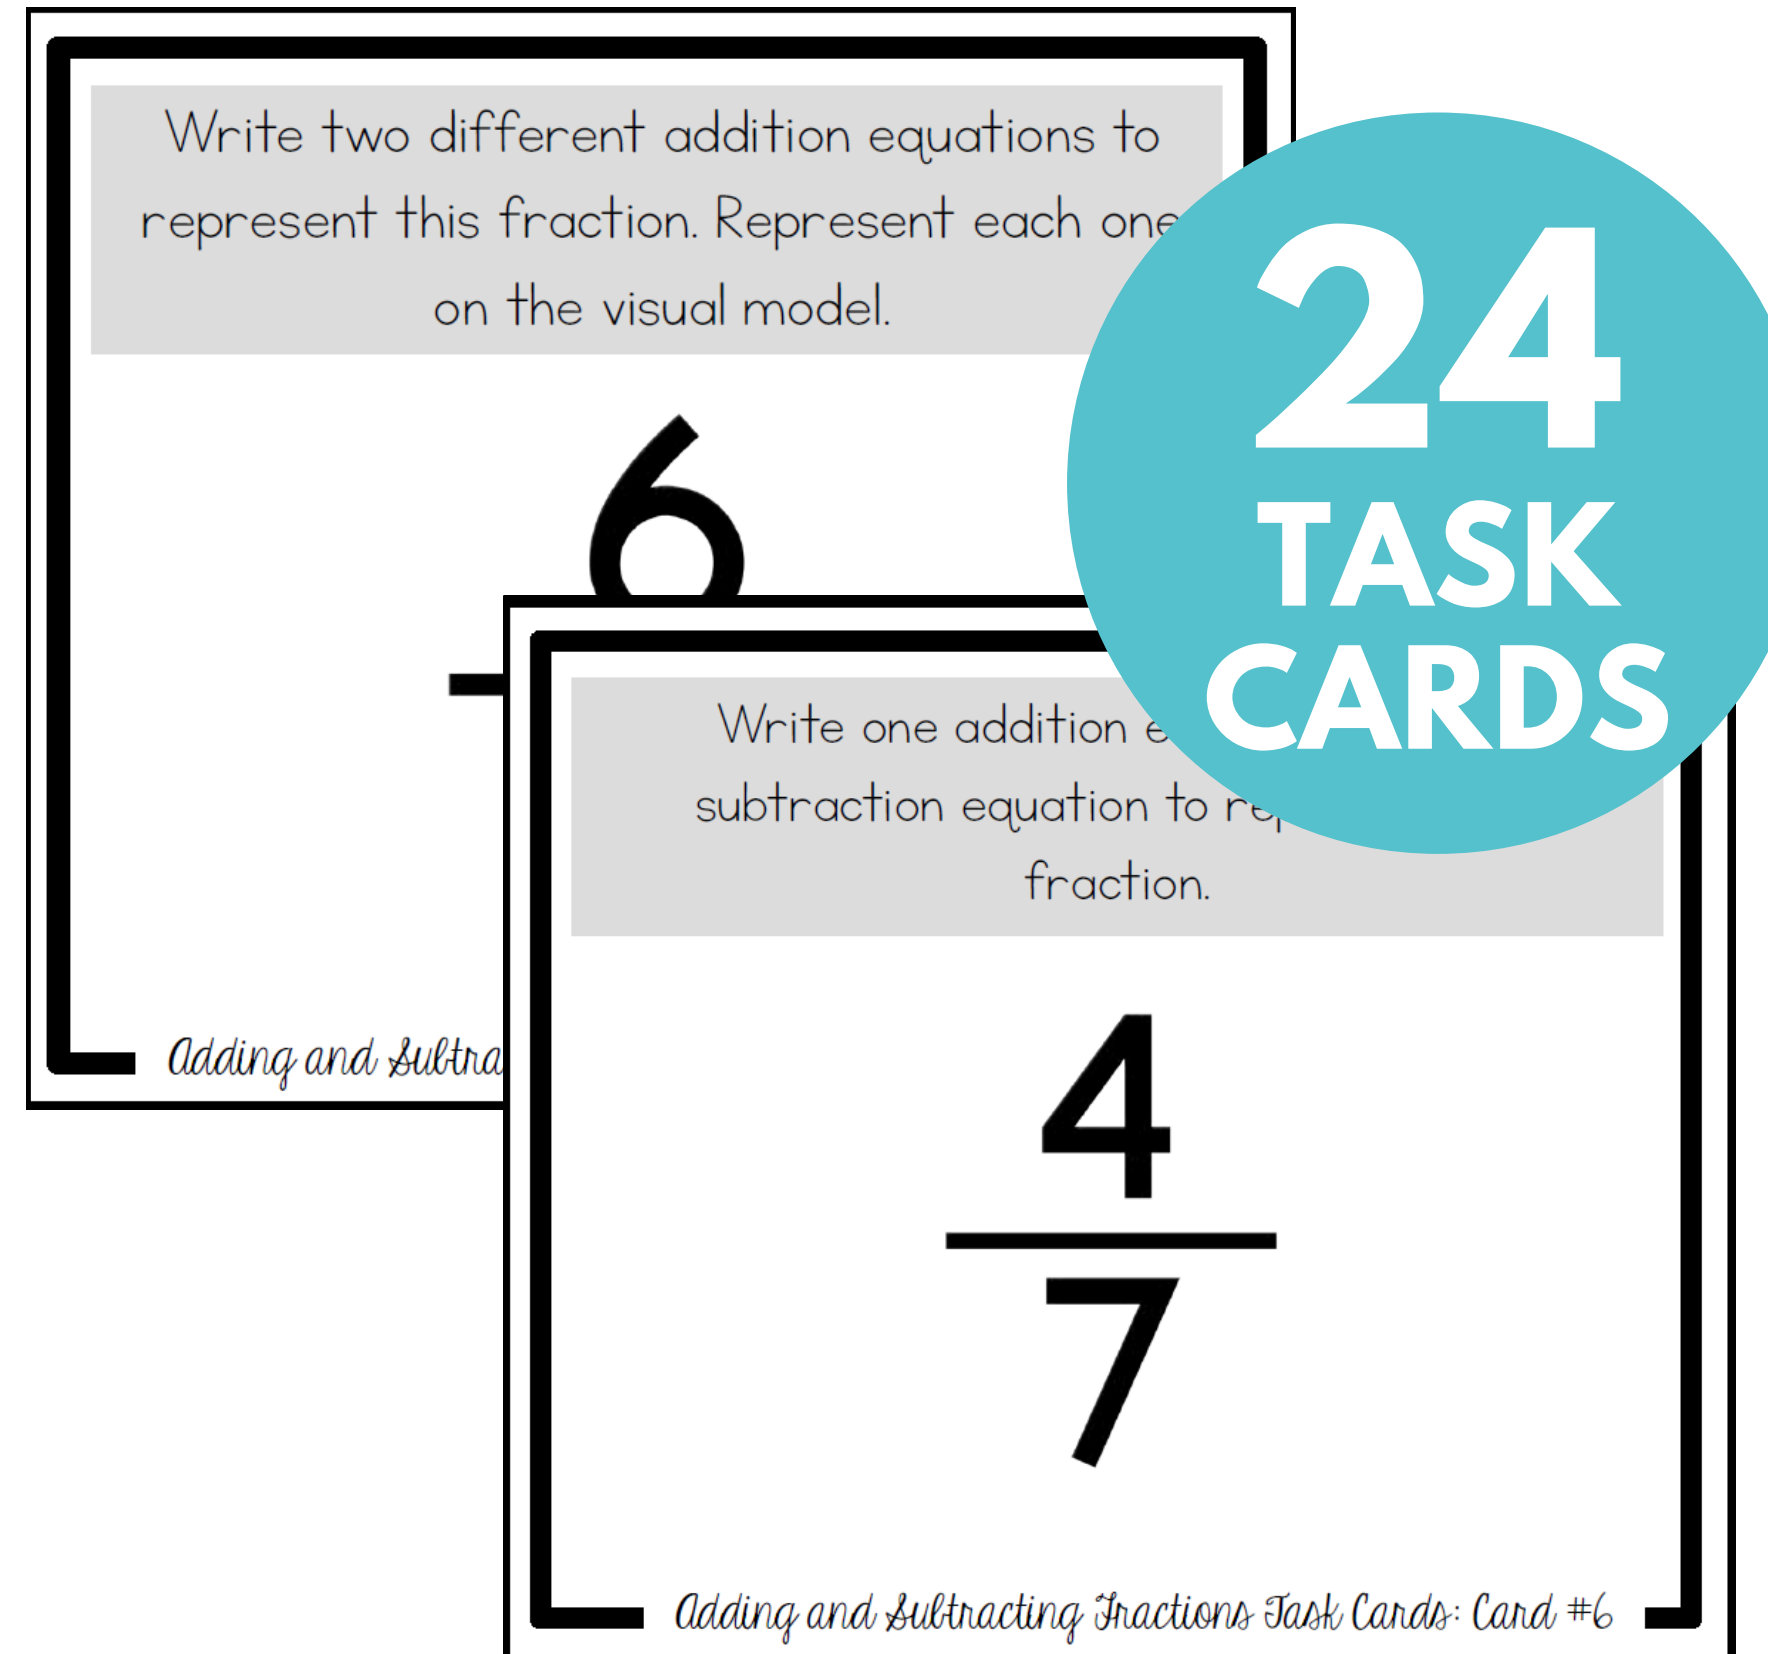

Of the 10 crayons, 3 are green, 4 are red, and 3 are blue. What fraction of the crayons are green and blue? What fraction of the crayons are red and green?

Adding and Subtracting Fractions Task Cards: Card #3

Are you teaching
fraction concepts?

This set of task cards reinforces the important skill of adding and subtracting fractions with the same denominators in a variety of ways.

These task cards will support your teaching as you teach adding and subtracting fractions for **understanding** and **flexibility**.

Here's what's included:

24 task cards

recording sheets to help students stay organized

3 vocabulary posters for the classroom
