

END OF THE YEAR ESCAPE ROOM

SHELLEY GRAY

It's the last day of school and while you were busy in the library, everyone left for the summer. You are scared and alone. Can you make it out or will you stay trapped inside the school all summer long?

OBSTACLE #1: WHERE IS THE LIGHT SWITCH?

Use the code grid to figure out where the main light switch is.

Ready to take your end of the year activities to a whole new level? Your students are going to LOVE this “Trapped” escape room-style activity where they will crack codes and work together as a team, ultimately overcoming the obstacles and getting out of the school!

oh no!

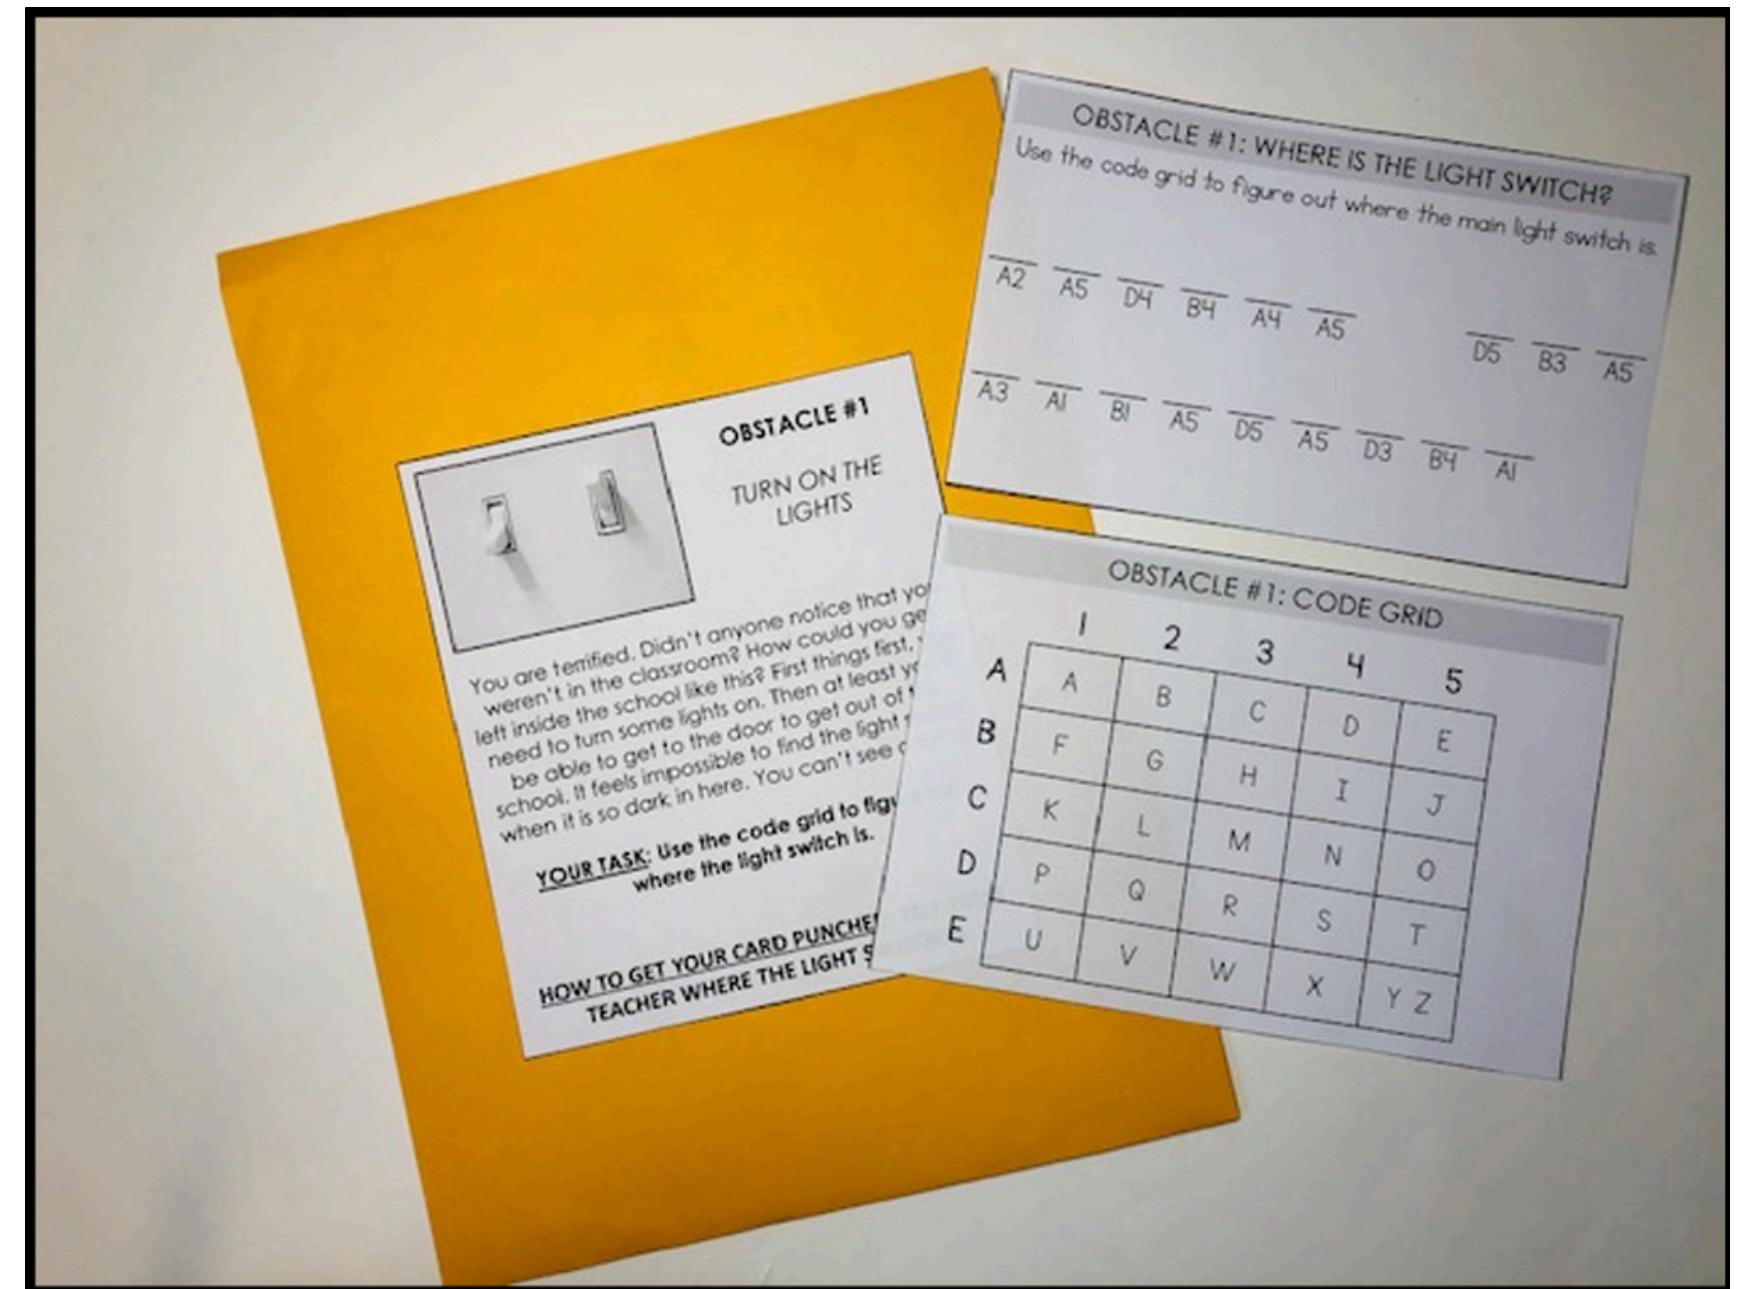

It's the last day of school and you just have one thing to do – return your library books. You head to the library while you are there, you get sidetracked reading your favorite superhero comic book. “I’ll just read a bit before you say to yourself. Finally you decide to head back to your classroom. But when you open the door, you can’t see anything. Everything is pitch black. “Oh no,” you cry, “everyone has left and I am here all alone!” How will you get out of here if you can’t even see what’s in front of you? Will you be trapped inside the school all summer long?

Are you ready for the challenge?

Requires
teamwork &
cooperation!

Your students will be completing six different challenges (or obstacles) in order to make it out.

These challenges will be completed as a small group of about four people in order to encourage teamwork and cooperation.

When a team has solved a challenge, one member will come to you with the answer and to get the next envelope.

The goal is for each group to complete the escape room, but it is motivating to have teams compete against each other to see who can solve it first.
