This resource includes a variety of engaging activities to teach, practice and reinforce double-digit addition without regrouping. With this download you will receive classroom and notebook anchor charts, no-prep printables (just print and use), three math stations and answer keys. See below for a sample of the types of activities included:

Reflecting on Addition Without Regrouping

When I see an equation like this, I know just how to solve it!

$$\begin{array}{r} 32 \\ + 24 \\ \hline \end{array}$$

First, I _____

Then, I _____

The answer is _____

Double-digit addition is easy/hard for me because _____

When I add using the standard algorithm (lining the numbers up), I always have to remember to _____

I can solve so many different double-digit addition equations! Here are some examples:

Addition Without Regrouping: Spinner Station

Teacher Prep: Print, laminate and cut the two spinners. These spinners can be used along with a paperclip. Simply place the paperclip in the center of the spinner. Place the pencil inside the paperclip so the point is in the center of the spinner. Now the paperclip can spin around using the pencil point. Photocopy recording sheets and place all materials together in a large baggie or math tub.
