# PLACE VALUE Task Cards: COMPARE AND ORDER NUMBERS TO 1000

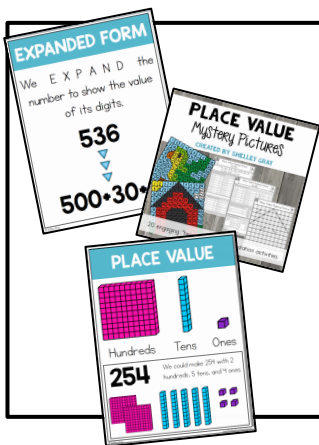

Created by Shelley Gray

# About this Resource

This resource includes 24 task cards to reinforce comparing and ordering numbers within 1000.

In this set of task cards, students will dive deeper into place value concepts to reinforce conceptual learning. Students will recognize that numbers can be represented by different combinations of hundreds, tens, and ones.

If your curriculum expects students to work with numbers to 1200, I have included 6 bonus task cards that you can use. You'll find them near the end of this file.

Ready to REALLY tackle place value this year? See all place value resources here:

## COMPARING USING PLACE VALUE

Compare the hundreds first.  
Then compare the tens.  
Then compare the ones.

**345**      **354**

STEP 1: Compare the hundreds digits. They are the same so we move to the tens.

STEP 2: Compare the tens digits. 5 is more than 4, so the second number is greater!

Twenty-four task cards to practice comparing and ordering in a variety of different ways:
