

The Math Choice Board

Created by Shelley Gray

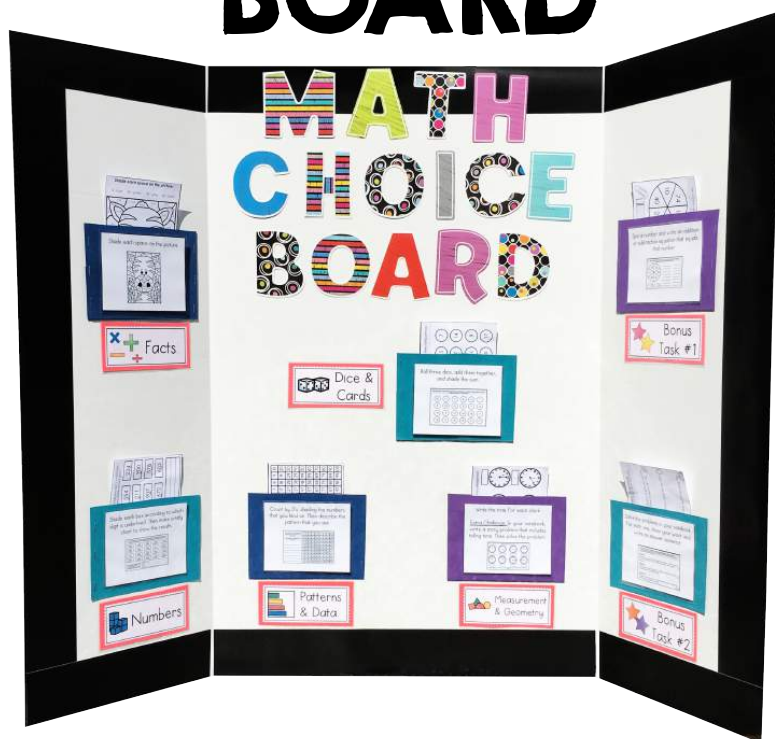

Are you looking for a *student-managed* way to spiral your math curriculum and ensure that review happens all year long?

Would you like to implement an *engaging, curriculum-related* choice board as a math station in your classroom?

Do you need a way to *motivate* your students when they first arrive in the classroom, at the beginning of class, or when they finish their work early?

Introducing...

THE MATH CHOICE BOARD

Several years ago, I created [The Early Finisher Board](#) – a solution for the fast finishers in your classroom. Over the years, thousands of people have successfully used that resource to motivate and engage their students. However, I have literally received hundreds of requests for something similar that focuses on Math only.

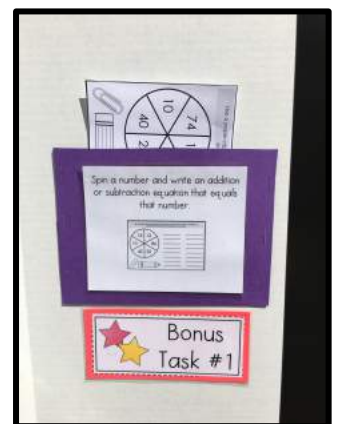

This is where The Math Choice Board comes in! The Math Choice Board is similar to The Early Finisher Board in that it allows students to choose which activities they do, and when they do them. This board consists of six sections: **Facts**, **Numbers**, **Dice & Cards**, **Patterns & Data**, **Measurement & Geometry**, and **Bonus Tasks**.

Each section contains an engaging, curriculum-related activity to engage your students. The tasks are switched out regularly so that your students always have new tasks to choose from!

The Math Choice Board is designed to promote:

- ✓ a method of spiraling the curriculum so that students receive continuous review of previously learned skills
- ✓ organization and independence
- ✓ freedom to choose based on personal preferences
- ✓ differentiation based on interests
- ✓ success for a wide variety of ability levels within your diverse classroom
- ✓ student engagement
- ✓ pride and excitement

This tool truly has the potential to transform your classroom.

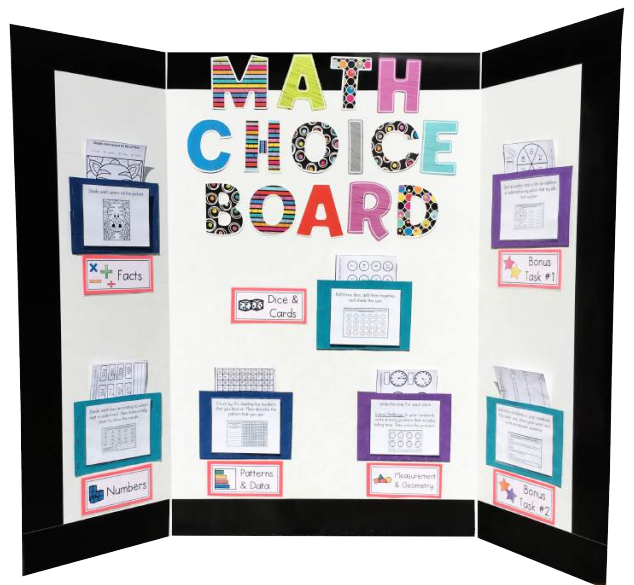

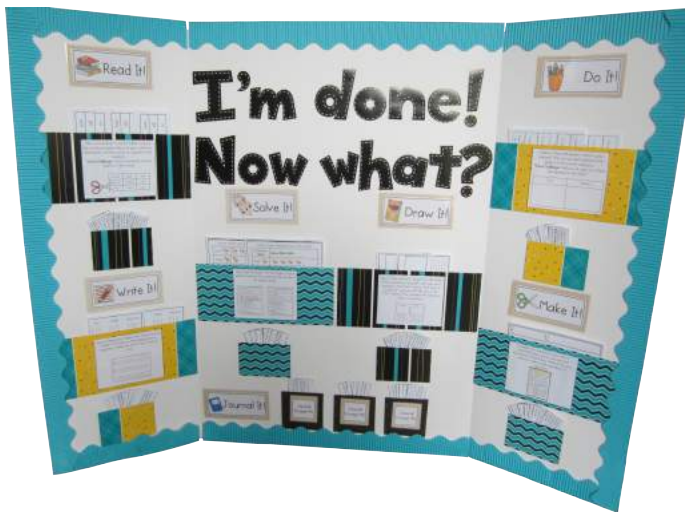

Mix and Match with your Early Finisher Board!

Are you currently using [The Early Finisher Board](#) in your classroom?

If so, the activities in The Math Choice Board and [The Early Finisher Board](#) can be *mixed and matched*.

The folder labels and activities have been designed to fit either board!

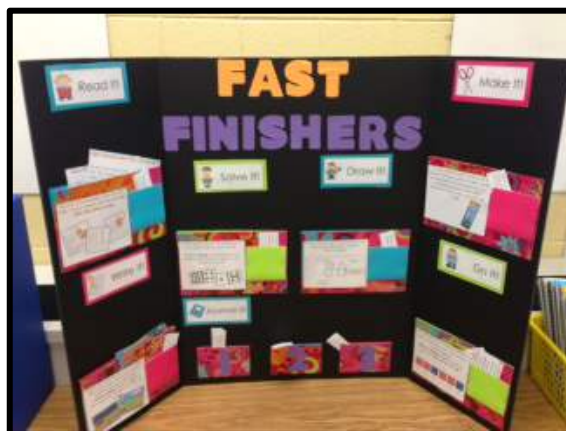

Use activities from The Math Choice Board in your [Early Finisher Board](#) for even greater variety, or vice versa! The options are endless!

The versatility of this resource is one of its greatest benefits. You may choose to use a tri-fold board, bulletin board, a cabinet, binder, or even folders to set up your Math Choice Board!

You might also use it as morning work, a math warm-up or a work station activity.

The pictures below are examples of how real teachers like you have set up their Early Finisher Boards. You can set up your Math Choice Board using these same, fantastic ideas!

Enjoy!
