

# DIGITAL: SUBTRACTION WITHIN 100 MYSTERY PICTURES

TEN SELF-CHECKING DIGITAL MYSTERY PICTURES  
FOR USE WITH GOOGLE DRIVE™

**SHELLEY GRAY**

# About This Resource

This digital resource is in Google Sheets™ format, making it compatible with Google Classroom™. This resource is only intended for digital learning; there is no PDF document included.

There are **ten digital mystery pictures** included in this resource. Each one reinforces subtraction to 100 in a fun way.

## How Do Digital Mystery Pictures Work?

Students will fill in the difference for each equation in the Google Sheet. Each time they fill in a difference correctly, part of the mystery picture will be revealed. If the student types the wrong difference, the box will turn red and they will try again. This makes this resource completely self-checking. Once all the difference are filled in, the mystery picture will be completely revealed.
